Requirements for the Government Unlimited Rate Plan with Subsidy Allowance and First Responder Government Rate Plan with Subsidy Allowance - Smartphones & Tablets

1) For the Subsidy to be effective, Customer will activate a line of Service under its Master Account. Each line of Service must be activated and maintained for at least 24 months from the date of activation without any suspension or termination of any line of Service (the "Subsidy Term");

2) Each line of Service must remain active, without suspension, for a 90-day period following the activation ("Minimum Activations Period");

Customer may either (i) pay T-Mobile the aggregate amount of issued subsidy for terminated lines of Service which are terminated before the end of the Subsidy Term within 30 days of termination of the affected lines of Service; or (ii) T-Mobile may charge Customer for the Activation Credits issued for each terminated lines of Service and Customer agrees to pay T-Mobile for the Subsidy issued to Customer for the terminated lines within 30 days of issuance of notice by T-Mobile.

Customer may either (i) pay T-Mobile the aggregate amount of issued subsidy for terminated lines of Service which are terminated before the end of the Subsidy Term within 30 days of termination of the affected lines of Service; or (ii) T-Mobile may charge Customer for the Activation Credits issued for each terminated lines of Service and Customer agrees to pay T-Mobile for the Subsidy issued to Customer for the terminated lines within 30 days of issuance of notice by T-Mobile.

Requirements for the Government Unlimited Rate Plan with Subsidy Allowance and First Responder Government Rate Plan with Subsidy Allowance - Smartphones & Tablets

1) For the Subsidy to be effective, Customer will activate a line of Service under its Master Account. Each line of Service must be activated and maintained for at least 24 months from the date of activation without any suspension or termination of any line of Service (the "Subsidy Term"); Each line of Service must remain active, without suspension, for a 90-day period following the activation ("Minimum Activations Period"); 3) Each line of Service must be activated in accordance with the terms of the Agreement;
4) Each line of Service which is activated under the Master Account can only qualify once for a device subsidy during the Initial Term; 5) The subsidy cannot be combined with any other discounts, credits or promotional offers; and 6) Customer's account with T-Mobile must be in good standing to receive the subsidy.

Minimum Activation Period/Termination. If any line of Service that received a Subsidy or any other future credit that T-Mobile may agree to provide to Customer is terminated prior to the end of the Subsidy Term, then Customer agrees to pay or reimburse T-Mobile the pro rata portion of the Subsidy that has been credited by T-Mobile to the Customer for each terminated line of Service (for purposes of illustration only, if Customer terminates the applicable line 12 months following activation, and if T-Mobile has issued a subsidy of $150 for such line, then Customer will reimburse T-Mobile $75 (i.e. 50% [12/24 months] X $150) for such terminated line). Customer may either (i) pay T-Mobile the aggregate amount of issued subsidy for terminated lines of Service which are terminated before the end of the Subsidy Term within 30 days of termination of the affected lines of Service; or (ii) T-Mobile may charge Customer for the Activation Credits issued for each terminated lines of Service and Customer agrees to pay T-Mobile for the Subsidy issued to Customer for the terminated lines within 30 days of issuance of notice by T-Mobile.

Government Fixed Wireless Unlimited High Speed Internet (Router Plan) Not available in all areas; addresses ineligible for 5G may be eligible for 4G LTE or other fixed wireless options. During congestion, customers on this plan may notice speeds lower than other customers due to data prioritization. Credit approval required. For use only at location provided at activation. Video streaming resolution depends on available speeds. For best performance, leave video streaming applications at their default resolution setting. Not compatible with some live TV streaming services. Coverage not available in some areas. Network Management: Service may be slowed, suspended, terminated, or restricted for misuse, abnormal use, interference with our network or ability to provide quality service to other users.
