

Missing Checks & Refunds

The Challenge

Recovering missing checks, and lost refunds, is a time-consuming and complex process. It can be challenging to know where to look, and frustrating to navigate the recovery process if you have identified any assets owed to your institution.

In fact, hospitals working on their own **only recover an average of 10% of assets owed them.**

How We Can Help

Our experienced team knows where and how to search hundreds of sources to identify your missing checks and lost refunds. We are fully versed in the management of claim forms and in the approval procedures across any and all agencies.

What Do We Need?

Your role starts and ends by providing the names by which your entity is, and has been, known, including any DBAs.

What We Recover

Our thorough process recovers all types of assets in just **10–16 weeks**.

Security deposits

Insurance premiums

Accumulated interest payments

Payments from utilities and government agencies

Orphaned accounts—bank, investment, and stock

Success Stories

Found monies from past Missing Checks & Lost Refunds audits.

\$750,000

Recovered for two 1,000+ bed, New Jersey-based healthcare systems.

\$1,000,000

Recovered for a major university healthcare system.

\$155,000

Recovered for a 150-bed Connecticut community hospital.
