

Since 2005, the R ONE Series® connectable rescue boat has had one mission - to be the one boat for all your missions. Our American-made boats are the safest, most versatile and effective inland-water response boats. Period.

Purpose-built for versatility, they serve across the country and around the world as the industry's most stable rescue and recovery boat, a highly maneuverable dive platform, and a water-based firefighting tool.

Connect two or more together with our exclusive ONELink system, and your options multiply.

- 5052 marine aluminum construction
- Draft of inches
- Ultra-stable
- Situation-tested in the most demanding conditions

Accessories
Dive/Rescue Platform - All-welded anodized aluminum construction. Removable and easily attaches to bow. While underway, the dive/rescue platform folds into the boat. When lowered it is at least 18" (45.72 cm) below water surface for easy entry into boat.

Light Bar Mount - All-welded anodized aluminum construction. Removable and attaches at stern. 6" double reinforced tubing in both ends to support search/navigation lights or light bars.

Center Console - Steering wheel, fixed seat and remote engine controls. Mounted to the transom to maximize work area in the center and forward areas.

Fire Pump System - Self-contained, portable/removable 500 gpm fire pump system. Includes pump, custom frame, suction hose with strainer and monitor.

ONELink System
Exclusive ONELink System allows R ONE Series® boats to connect in a variety of configurations to fit mission needs. Stable and rigid while connected, boats can be separated in just seconds.

One boat for all your missions...

- Dive Rescue/Recovery
- Firefighting
- Flood Evacuation/Rescue
- Patrol/Security Enforcement
- Surface Recovery
- Swiftwater Rescue
- K9 Search and Rescue
- Incident Command/Staging

The R One Series® 1660
Connectable Rescue Boat

- Connectable
- Versatile
- Stable
- Safe
- Durable
- Rapidly Deployable
- Shallow-water Capable
- Diver and K9 Unit Friendly

Exclusive ONELink System
Allows multiple R ONE Series® boats to interconnect. ONELink creates a quick rigid connection in multiple configurations and disconnects in seconds.

K9 Walkways
Custom fit nonskid panel system enable K9 units unobstructed access to the water. Keeps them safe and focused on the task at hand.

Floating Sea Boxes
Removable floating boxes can be used as flotation/rescue devices or deployed to create more working area.

Double Stack Transport Trailer
Always bring all the water gear you might need to every mission. Saves room at the station, too.

Connect Multiple R ONE Series®
Creates a stable platform for surface recovery, dragging, site management, or evacuation. Connects and disconnects in seconds.

Exclusive Dive & Rescue Platform
Deployable in-water platform makes rescue/recovery and dive/K9 operations safe and convenient. The platform folds into the boat when underway.

Speed When You Need It
R ONE Series® boats have a top speed of 38 mph, getting you to - and from - the scene quickly.

Portable Fire Pump
Portable yet powerful, the removable fire pump converts your R ONE Series® boat into a waterfront firefighting resource.

Trusted Worldwide
Across the country and around the world, first responders rely on the R ONE Series® boat to be the one boat for every mission.
