# TRENDS

## AND WISE INVESTMENTS

For property managers **multi-use zones** provide a greater return on investment.

**For residents** they allow for social distancing while still enjoying a sense of community, convenient parental supervision, more leisure options, and attractive environments.

This colorful soccer field was just the right choice for the residents in this community. Resurfacing options are limitless. Several properties recently asked us to create tricycle paths combined with fitness and other adult activities.

Surface games use little space, allow for single and multiple-player fun, and they're great for families

Tables for gathering, watching children, or dining are a great addition to any amenity area. And when you add some shading, it's a guaranteed favorite.

Fitness areas are a versatile, cost-saving alternative to indoor fitness rooms. You can start small and add options over time.

Dog Parks remain as popular as ever. We've created designs that are more attractive and uniquely suited to a wide variety of dog lovers.

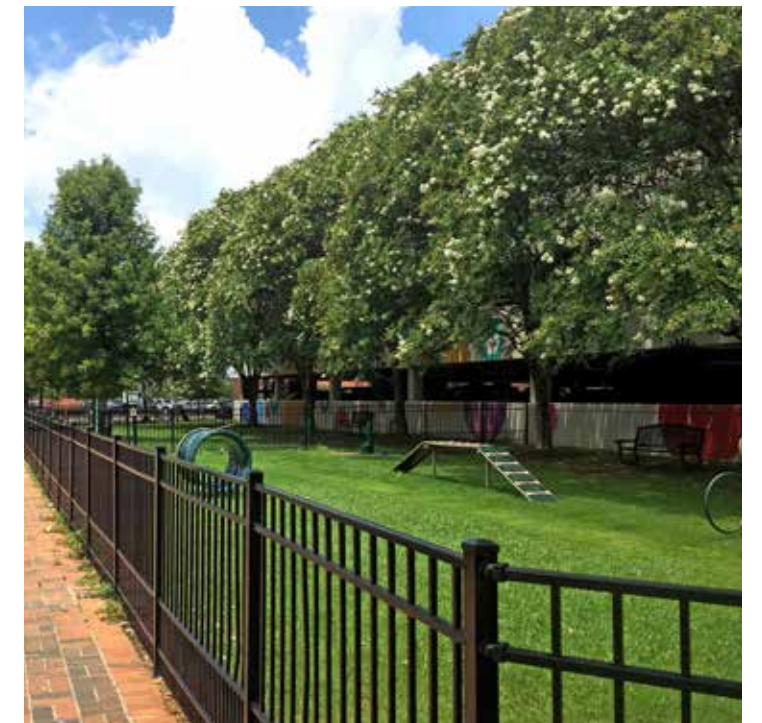

*Just one old tennis court can be converted into so much more for your community.*

\$70,000 - \$85,000

\$62,500 - \$75,000
