

# Video Board

Visualize emergency **live streams** simultaneously

The screenshot displays the Video Board interface. On the left, a grid of six video thumbnails is shown, each with a duration, phone number, and address. On the right, a 'Video Sessions' panel lists the same sessions with search and play controls.

Duration	Phone Number	Address
02:34	(305) 248-0170	10112 NL 9th Street Cir 6 Miami, Florida (FL), 33172
01:48	(305) 555-0116	10112 State 369 Rte, Cordale Cir, Port Crane, Florida (FL), 33833
01:16	(305) 238-2757	10280 NW 9th Street Cir 2 Miami, Florida (FL), 33172
00:59	(305) 249-8343	620 NW 214th Milk and Honey St Miami, Florida (FL), 33169
00:46	(305) 331-0219	1551 Jefferson Ave Miami Beach, Florida (FL), 33139
00:41	(305) 256-5776	15102 Grow 4th Street Cir 203 Miami, Florida (FL), 33172

## What is Video Board?

Video Board is a cloud-native emergency response visualization solution that live streams citizen video, supporting multiple streams, audiovisual alerts, recent call playback, pinpoint caller locations, and more.

## Multiple Live Streams

Video Board lets you visualize multiple live video streams with audiovisual alerts showing address and phone number so you can triage incidents and improve your emergency response efficiency.

## Pinpoint Caller Location

Know exactly where your callers are, even when they don't themselves, conveniently displayed on a map next to your selected video within the Video Board.

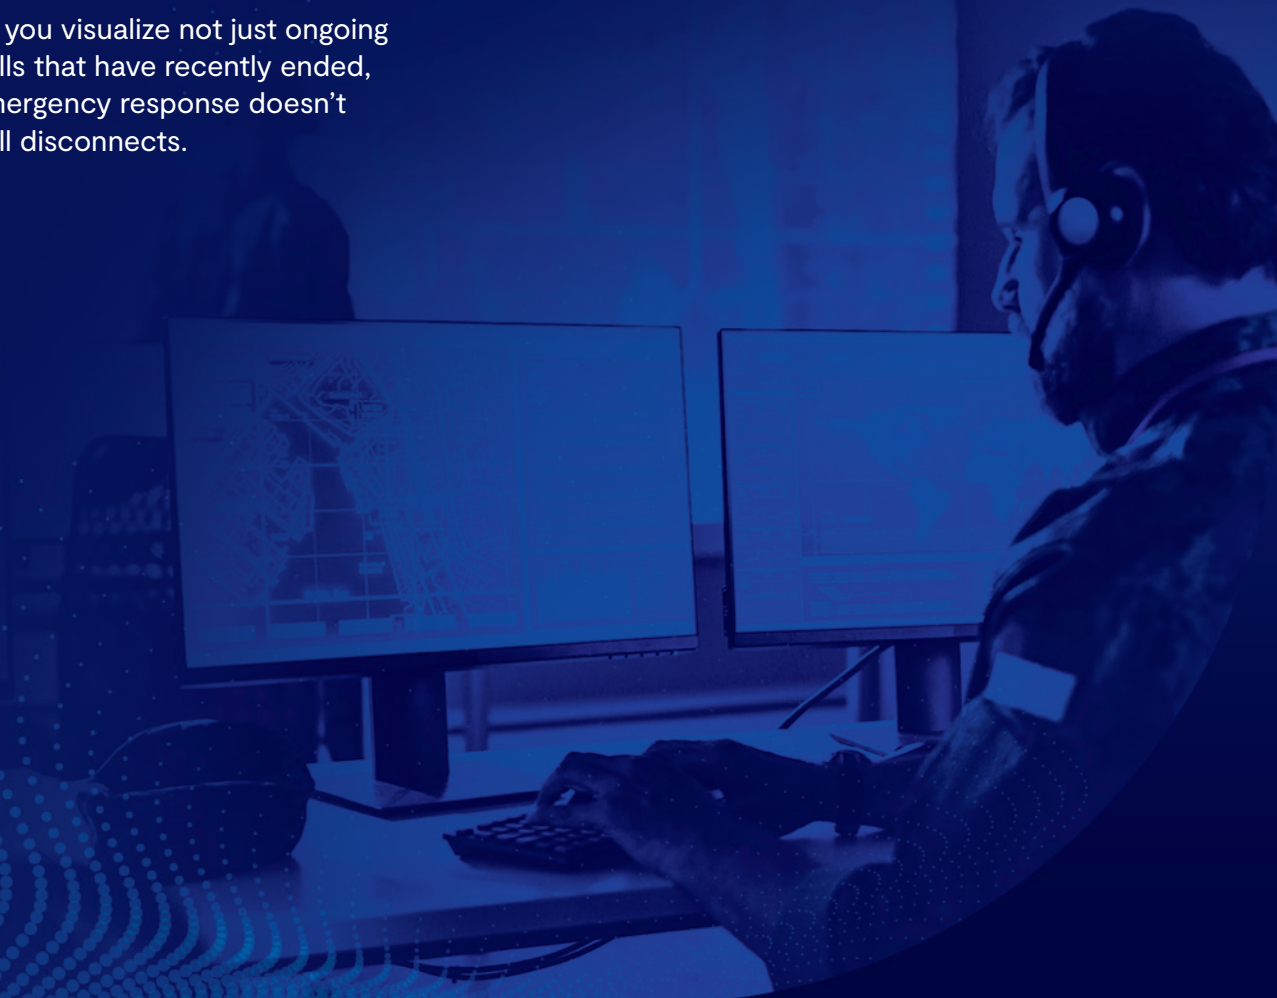

## Perimeterless Security Architecture

Data security is built into the fabric of Video Board, with password protection and Perimeterless Security Architecture to keep your sensitive information off-limits to hackers on the internet.

## Recent Call Video Playback

Video Board lets you visualize not just ongoing calls, but also calls that have recently ended, because your emergency response doesn't end when the call disconnects.
