

National Purchasing Partners (NPPGov) Network Connectivity Contract #PS21035

Simplified procurement for State, Local and Education (SLED) entities

From improving operational efficiency and agility, to better managing threats and risk, the future of digital government depends on an agency's ability to modernize IT services.

As a trusted provider to the public sector community, Lumen offers cost-effective edge compute, cloud, security, collaboration, and professional services. And procurement is easy and convenient when ordering via the NPPGov Network Connectivity Contract and working directly with Lumen's experienced and knowledgeable staff.

Our dedicated State, Local and Educational (SLED) team of sales, support, technical and program management professionals provide high quality solutions and outstanding customer service.

Lumen Solutions on NPPGov Network Connectivity Contract

Deploy the platform for next gen government

Adaptive Networking

Today's network requires the flexibility and agility to meet the equally dynamic needs of a digital driven society. People, machines, processes, sensors, and systems everywhere require uninterrupted access to data. A digital-ready network is responsive, intelligent, and secure to instantly access, analyze, and act upon data. Lumen refers to this as Adaptive Networking. At every step, we help state and local governments evaluate where they are now, where they are going, and how to get there. Our approach to Adaptive Networking enables customers to modernize the network for the long term.

Voice and Unified Communications

Effective communication is vital to keep the government workforce connected and productive. The transition from legacy services

to more efficient voice and unified communications requires a robust underlying network. As state and local agencies are looking at new ways to communicate and support the growing number of mobile and remote workers, Lumen offers leading-technology options that can coexist with existing technology. We offer a high-touch consultative engagement for agencies, providing customized

NPPGov is a national cooperative procurement organization based in Seattle, WA offering publicly solicited contracts to government entities nationwide. Our contracts are created through a public solicitation by a Lead Public Agency. Access to our cooperative contracts is complimentary with no obligation to purchase.

NPPGov serves a variety of Government and Nonprofit organizations. Public Safety GPO and Law Enforcement GPO are programs of NPPGov with contracts that focus on Fire/Rescue and Law Enforcement members' needs. All members have access to a broad range of publicly solicited contracts along with individual discount programs and negotiated contracts for below threshold purchases.

solutions into a streamlined, end-to-end digital cloud communications experience helping to lower costs but improve efficiency.

Managed Services and Consulting

Our Managed Network Services offer 24/7 expert support for new site expansion, bandwidth upgrades and equipment management. Professional Services include experienced architects, engineers and technicians that provide network implementation, upgrades, monitoring and maintenance. Our ability to provide managed oversight over our entire network solution simplifies and automates the operational experience for our customers, offering:

- Fully operationalized equipment, service, and updates for comprehensive support
- Managed layer of encryption that protects compliant data in motion across the network
- Custom options for tailored solutions that are simpler to the most complex

Connected Security

With the number of digital endpoints and connected devices proliferating data across the network, now more than ever, data MUST be protected. The network is a differentiating factor to ensure uptime, infrastructure availability and application performance. But the network can also be a differentiator to help keep data protected. At Lumen, our belief is that security should be comprehensive, designed in and not bolted on. We help government to simplify security with integrated solutions and managed firewalls that embed high-fidelity intelligence, automatic threat detection and proactive response directly into our platform services, helping to identify and mitigate cyberattacks before they do harm.

Edge Computing Solutions

As remote and hybrid workforces become more common, government agencies must deliver services and capabilities faster than ever before. Edge computing moves data and applications closer to user interactions, allowing agencies to take advantage of the emerging technologies that will redefine how government interacts with citizens and providing exceptional application

performance from virtually anywhere.

Big Data as a Service

Our comprehensive Big Data & Advanced Analytics Solutions provides government agencies with data-mined business insights to help in converting data into action for strategic and tactical decision-making. Lumen offers dedicated support and expertise to harness the massive power of Big Data with advanced analytics consultation aligning to agency objectives.

Smart Solutions (Internet of things)

Smart Solutions create unique end-to-end experiences for the guest, fan, or citizen. It combines our core network, wireless connectivity, smart devices, applications, and data analytics. Lumen experience and expertise offers government, strategy and design consulting, program management, application development, implementation, and post install support services in addition to IT solution services for a smart environment.

Hybrid Cloud Services

Boost your agency's IT agility with seamless cloud connections, streamlined management and secure, direct access to many of the world's top cloud providers from Lumen. We provide complete support for your hybrid cloud needs. Accelerate your app deployment and get to the cloud in minutes with our flexible hybrid infrastructure solutions and centralized management platform. Securely link your data center and cloud environments in real-time and scale bandwidth on-demand to meet today's hybrid cloud requirements. Seamlessly manage, govern, and modernize your IT across virtually any infrastructure and deliver a more consistent customer experience. Make the most of your IT with expert design, implementation and management of your applications or infrastructure—in our data center or yours. Whatever your need, Lumen has a hybrid cloud ecosystem built to meet your needs.
