

# SAFER SCHOOL SOLUTIONS

is empowering educators to make data-driven decisions in support of safer school environments.

Safer School Solutions offers a comprehensive risk management platform to support school districts and improve the implementation and accountability of their physical and cyber safety and security policies. Schools and Districts that partner with Safer School Solutions will have access to resources that enable **data-driven decision-making** to help improve the safety of students and staff. Our platform provides an **all-in-one management solution** for physical and cyber security needs, **real time actionable data**, a **collaborative approach** to school safety & security, and more.

Disparate internal systems such as spreadsheets, and Google forms are common ways schools currently store safety data. Your schools may be doing the same. Additionally, schools rely on data collection agencies such as the U.S. Department of Education, cybersecurity organizations, cybersecurity reports, and government agencies to make informed decisions.

**How would you efficiently gather and parse the data relevant to your school to make a business case for additional resources?**

The EagleEyED™ platform allows schools to:

**Showcase data** which supports security investments and grant opportunities

**Create and conduct site assessments** aligned to policies, protocols and procedures

**Track emergency drills** such as fire, tornado, active assailant, and more

**Track action items** and projects for follow-up and resolution

**Analyze data** to maximize transparency and management of enterprise risks

## For small and large schools

**We tailor our platform to the individual needs of your school** should you need it, ensuring customer success with technical support, and training.

## For districts

**We offer what you need to track state-mandated requirements.** We help you gather data across your locations to inform operational planning based on risk and risk scoring.

**Ready to take your school's security to the next step?**
