TRAINING

Tailored Training Proposal

Comprehensive deep dive on the current culture of safety and a customized ongoing training plan, with integrated RedBag tools and technology to help improve and support the safety culture for years to come.

All-Inclusive Training Catalogue

Training plans are structured to allow unlimited choice between a variety of modules to support your schools' unique needs. Geared towards district leadership, building safety teams and first responder partners with the knowledge, tools, and strategies necessary to foster a robust culture of safety across schools.

Not just another PowerPoint Presentation

Our training is delivered by professorial instructors with real-life experience and is designed to be engaging with many interactive opportunities including hands-on, real-life discussion and tabletop exercises.

Customized Templates and Materials

Our training courses are designed to facilitate collaborative planning sessions using tailored templates.

TOOLS

Emergency Supplies

Included in standard bag:

- 10 large-sized gloves
- 3 compressed gauze
- 1 mylar blanket
- 1 pair of medical shears
- 1 CPR mask
- 2 trash bags
- 2 triangle bandages
- 1 emergency bandage
- 1 tourniquet
- 1 command hook
- 1 laminated RedBag QR code

Customization is available.

The RedBag

Visual cue to teachers and staff and is hung in the safest part of the room. It is a "beacon of hope" to represent safety in the classroom.

Educational Mode

When not in an active incident, scanning the QR Code attached to the RedBag provides training videos on how to use the emergency supplies in the RedBag.

TECHNOLOGY

RedBag Communications

Silent- two- way communication between first responders/ school leadership directly into each individual classroom. Providing teachers/staff with the ability to receive factual information and summon help directly when needed.

Communications Software accessed without a Pre-Installed App

Access with any smart device with a camera using the QR Code attached to the RedBag.

Incident and Drill Management

RedBag is designed to be used the same way whether it's a real incident or training. Providing a first of its kind ability to document and create accountability around post-incident data. The after-action report, teacher survey data, and integrated site task lists are some of the tools available for use.

Emergency Protocols Checklist Built In

Completed from the classroom, this identifies rooms that are occupied, their status and number of individuals.

First Responder and School Leadership Alerting

All pre-identified users are text a notification via text or email to access critical incident data. This link does not require credentials to access. No more trying to remember a password in an emergency.

RedBag Safety Audit

Inventory management for emergency supplies and audit of key safety concerns (i.e. doors properly lock, intercom working, etc.) built into QR code technology which generates a summarized report that is classroom specific. Identifies missing or expired items, and action items to be corrected immediately.

Geo-Located Classrooms

First-responders and School leadership know exactly where help is needed. RedBags are QR code - geo-located to the "out of sight" location in the classroom and not assigned to individuals via an "app" on a phone.

Alyssa's Law Compliant

RedBag includes a "Silent Alert" feature so teachers can alert law enforcement and school leadership and summon help.

RBIM (RedBag Integration Module)

Hardware IOT interface to integrate with existing alerting platforms already established within the building. Designed to automatically start a RedBag multi-hazard incident.
