

CVE STATEMENT OF QUALIFICATIONS

HISTORY

CVE is a legacy company. Founded in 1915 by Henry Frederick Laub, Cache Valley Electric holds the oldest electrical contracting license in the state of Utah. The privately held electrical construction company continues its recognized reputation for excellence of service under the third generation of leadership of Jim Laub, the grandson of the founder.

EXPERIENCE

CVE brings extensive expertise and a 110-year tradition of excellence to projects of any size and scope. We pride ourselves in our employees and the necessary knowledge they bring to projects. CVE provides training and experiences to help our teams stay at the forefront of the electrical construction industry.

Cache Valley Electric is a market leader in all areas of electrical construction and technology solutions. We are a ground to cloud™ provider of: power delivery and civil infrastructure; heavy industrial, commercial, and mission critical electrical construction; teledata, multimedia, and wireless systems; intrusion detection and access control; network, data center, security, cloud, and IoT solutions. At Cache Valley Electric we focus on excellence—the highest quality work always completed with integrity and precision.

We have experts for each phase of the construction process including a complete design-build staff, professional electrical and networking engineers, mission critical experts, VDC/BIM team, prefabrication team, low voltage technicians, elite electricians, and LEED APs. The electrical infrastructure on every Cache Valley Electric project is built to the highest standards and designed with the ability to support technology services as well.

FINANCIAL

Cache Valley Electric Company has been financially solid and viable since our inception in 1915. CVE has never missed a payroll, nor defaulted on a contract. Cache Valley Electric currently has a bond capacity of \$1 billion.

SAFETY

At CVE, safety is our first priority. Our Safety Team is dedicated to ensuring that every CVE employee goes home safe to his or her family every day. Our 20+ full-time safety professionals champion our safety-first culture on every job site, every day.

SAFETY OVERVIEW

At Cache Valley Electric, safety is our first priority. We have built a culture of safety starting with CVE owner and CEO, Jim Laub, who believes that our employees are our greatest resource and keeping them safe comes first, always. Our 20+ full-time safety professionals are dedicated to ensuring that every CVE employee goes home safe to their family every day. A combination of receptiveness from our field personnel and hard work from our safety team is demonstrated by CVE's consistent EMR and additional safety metrics—outlined below.

SAFETY METRICS

YEAR	EMR	LTIR	TRIR	MAN HOURS
2025	.72	pending	pending	pending
2024	.66	0.04	0.73	5,681,477
2023	.77	0.0	0.65	5,237,959
2022	.65	0.15	.67	4,150,412
2021	.63	0.15	1.04	4,028,238
2020	.76	0.0	1.05	4,192,497

SAFETY PROGRAM

Cache Valley Electric believes that training is a critical ingredient to a successful safety program. Each new employee is given a thorough new employee orientation with jobsite-specific training. At all jobsites each day's work begins with stretch and flex, pretask, and attendance at the morning safety meeting. CVE also communicates a monthly safety update to all employees, reporting all safety incident reports as well as safety wins, which results in a well-informed workforce.

CVE is a strong advocate of proactive monitoring for pretasks and elimination of risks. The CVE App tracks pretasks, trainings, qualifications, and more. Near Miss, First Aid, Lost Time, and Recordables are all tracked and compared to measure safety trends and improvements.

SAFETY MANUAL

Cache Valley Electric realizes that safety policies and procedures cannot be enforced unless they are published. The CVE Safety Manual undergoes continual review and revision in order to keep pace with on-going safety issues and new government regulations. For those projects that require site specific safety programs, the CVE Safety Manual provides the basis for owners and our company to establish those specific needs. Certain tasks are outlined within our safety manual that require written checklists to ensure the safety of our personnel and others that are working in the immediate area. A copy of our safety manual will be provided upon request.

CVE PORTLAND OVERVIEW

WHAT WE DO

CVE Portland focuses on technology and the infrastructure that supports it. We work with regional electrical contractors as a structured cabling and technology partner. With over 100 certified field technicians and 12 team members in-office providing various levels of support, we can provide solutions for low voltage, security, infrastructure, DAS, and technology projects of any size and specification.

TELEDATA

CVE designs and manages low voltage infrastructure cabling for new construction, tenant improvements, and renovations.

MULTIMEDIA

Audiovisual and technology solutions for today's modern business and communication interactions.

PHYSICAL SECURITY

Fully integrated access control, intrusion detection and video surveillance.

WIRELESS DISTRIBUTED ANTENNA SYSTEM (DAS)

Expand wireless network connectivity and capacity, and expand cellular coverage in new and existing buildings by improving data speeds.

CVE TECHNOLOGIES GROUP

Cisco Gold Partner with master specialization in Collaboration, Network, and Security.

SATISFACTORY RECORD OF PERFORMANCE - SCHEDULE

Cache Valley Electric is committed to deliver the personnel, skills, equipment, materials and professionalism for successful completion of any project on time and within the given budget. Since 1915, our company has been known as the trade partner that owners and general contractors rely on for on-time project delivery. Because we are a union contractor, we are able to pull resources quickly when jobs require additional labor. CVE also has excellent supplier relationships and can get excellent pricing and fastest delivery possible for supplies and materials.
