FLEET360 FLEET MANAGEMENT SOFTWARE

Built for fleet managers, by fleet managers, Fleet360 gives your fleet team the end-to-end tools and insights needed for fleet success.

› Elevate **Fleet Availability**

Get real-time visibility into daily shop operations, ensuring maintenance is done efficiently, on-time, and to your quality standards.

› Enhance **PM Compliance**

Schedule and track PMs to reduce unexpected breakdowns and save time and money associated with major repairs.

› Improve **Budgeting & Cost Control**

Use detailed reporting tools to help you control fleet costs, manage budgets effectively, and identify opportunities for savings.

› Track **Technician Productivity**

See labor hours and job performance so you can easily analyze job time frames, while improving technician accountability and productivity.

› Optimize **Asset Replacement Planning**

Leverage insights into asset lifecycles and know when to replace based on real-time data including history, costs, utilization, and depreciation.

› Simplify **Work Order Workflows**

See all your work orders moving through the shop by tying together workflows across parts, equipment, fuel, purchase orders, and more.

“ We switched from Assetworks to RTA and have been absolutely delighted with the product, support, onboarding, integrations and flexibility in a single all-you-can-eat product!

Constance Englert, Dir of Transportation Services
University of Massachusetts, Amherst

➤ Upgrade **Inventory Management**

Monitor parts levels and usage, automate inventory and warranty tracking, and simplify ordering to ensure your shop has the parts needed when needed.

➤ Better Track & Report **Fuel Usage**

Identify cost-saving opportunities and monitor emissions for environmental compliance with tools that track fuel usage and consumption trends.

➤ Improve **Accident Management**

Ensure accuracy of information and the documentation of accidents with streamlined processes for repairs.

Meet our
Consultants

In my 30 years in fleet, I can honestly say the consulting team is the best in the business. They offer a unique personal touch of caring: caring about your fleet and caring about you as a customer. They want you and your fleet to succeed!

Dan Zenger, Fleet Superintendent
City of Vancouver

› Operations Assessment

Evaluate operational performance through the lens of your current challenges and identify opportunities for improvement.

› Technology Analysis

Establish roadmaps to implement and use innovative fleet technologies like advanced telematics and artificial intelligence.

› Fleet Data Analysis

Review your fleet's data to understand the organization's performance and find ways to optimize.

› EV Planning

Develop EV and alternative fuel vehicle transition plans that are realistic and manageable, and account for mandates and compliance requirements.

› Optimization Studies

Determine the optimal fleet size and composition to ensure users have the most suitable vehicle for the jobs they need to perform.

› Staffing Plans

Calculate technician and support staff requirements so you can justify the staff resources you need.
