

Your supply chain was built to deliver revenue, not just supplies.

Every truckload of indirect spend consumes capacity, labor and fuel without generating revenue. Staples Business™ can reduce these costs by taking over the delivery of cleaning, restroom and facility supplies, allowing your supply chain to focus on higher-value products and activities.

Maximize truck utilization.

Reserve your fleet capacity for revenue-generating products instead of facility supplies.

Lower labor costs.

Eliminate the need to receive, store, pick, pack, transport and replenish indirect spend items throughout your network.

Reduce carrying costs.

Get next-day, direct-to-site delivery to over 98% of the U.S. and 99% fill rates to help reduce warehousing and emergency purchases.

Access 18,000+ professional-grade facility products.

Stop adding inventory burden to your organization.

Are you losing revenue by self-distributing non-revenue-generating items? See how you can reduce spend and optimize efficiencies.
